

# SAIF UR REHMAN

Gujranwala, Pakistan | (+92) 323-7829696 | [itssaifurrehman@gmail.com](mailto:itssaifurrehman@gmail.com) | [www.linkedin.com/in/saifurrehman96](https://www.linkedin.com/in/saifurrehman96)

## FRONT-END WEB DEVELOPER

*Developing the overall UI/UX and features of a web application to enhance the user experience.*

**Analytical Web Developer with hands-on experience in developing user-facing applications and integrating the front-end and back-end aspects of the web application with 4+ years of practical experience.** Highly instrumental in documenting application changes and developing updates, ensuring website accessibility and security to protect sensitive data and user information for website functionality. Excel at identifying user and system requirements for new websites and applications, addressing potential issues and areas of improvement, and staying up-to-date with the latest front-end technologies, best practices, and trends while creating multimedia solutions for client needs.

## KEY HIGHLIGHTS

- Received a promotion to the role of Software Lead following the successful launch of the project, assuming leadership responsibilities and guiding a team of junior professionals in the design and development of a web application using VueJS and ReactJS.
- Enhanced support team productivity by developing dynamic log filters to systematically monitor logs, thereby enabling efficient query resolution.
- Successfully migrated a Vue 2 project to Vue 3, effectively managing complex tasks such as composite APIs, Lifecycle Hooks, and the removal of deprecated dependencies. Additionally, assumed responsibility for overseeing security updates and addressing issues related to VueJS.

Responsive Design | Cross-browser Compatibility | Web Performance Optimization | Agile Methodologies | UI/UX Design | API Integration | Build Tools | Package Managers | Performance Enhancement | (CI/CD) | Git/GitHub | NPM/YARN

## CAREER EXPERIENCE & ACHIEVEMENTS

**LUXTAG •** Malaysia, Nov 2021 – May 2023 (Remote)

**Lead Software Engineer/ Product Owner •** Nov 2022 – May 2023

- Elevated to the role of Software Engineer from Front-end Web Developer, specializing in the creation of user interfaces using ReactJS and VueJS. Enhanced Rest microservices and expanded expertise in ExpressJS and NodeJS.
- Led the VueJS development initiative and implemented Docker containers to simplify the packaging of microservices. This streamlined the deployment process, ensuring efficient application deployment and scalability.
- Coordinated the smooth integration of software components, enabling the development of a fully functional software system. Conducted thorough assessments of operational feasibility throughout the process.
- Implemented performance optimization strategies within ReactJS and VueJS applications, resulting in faster load times and improved overall user experience.
- Collaborated closely with cross-functional teams to identify and resolve complex technical challenges, fostering a culture of problem-solving and innovation within the software development process.

**Front-End Web Developer •** Nov 2021 – Oct 2022

- Demonstrated advanced proficiency in VueJS and ReactJS to architect complex, modular, and reusable components, ensuring the scalability and maintainability of sophisticated user-facing applications. Stayed updated with emerging JavaScript trends, proactively enhancing application performance, responsiveness, and security.
- Assumed a leadership role in orchestrating the seamless migration of a Vue 2 project to Vue 3, overseeing intricate tasks encompassing composite APIs, Lifecycle Hooks, and meticulous removal of deprecated dependencies. Spearheaded the management of security updates and diligently addressed issues, showcasing strong project management acumen.
- Collaborated effectively with product managers and UI/UX designers to transform information into valuable data, driving data-driven decision-making. Streamlined UI/UX development processes for cohesive and browser-compatible designs.
- Employed agile methodologies for adaptive development, emphasizing teamwork and rapid iterations to meet user requirements. Implemented rigorous frontend testing and version control practices to ensure code quality and project integrity.

**FIVERR • Remote****Web Developer/Technical Writer • June 2019 – July 2022**

- Created and curated user-friendly websites, supplementing traditional documentation with interactive elements such as guided tours, online videos, demos, and other educational techniques. This approach significantly increased user clicks by 25% and customer purchases by 33%, with particular emphasis on optimizing checkout pages for maximum effectiveness.
- Led the development and maintenance of high-traffic websites, effectively managing page views and ensuring an exceptional user experience. Leveraged interactive and dynamic design principles to guarantee optimal engagement and navigation for visitors.
- Developed and maintained multimedia educational resources that extended beyond conventional documentation. These resources, including guided tours, online videos, and interactive demos, provided users with intuitive and engaging learning experiences, contributing to improved user retention and satisfaction.
- Led the creation of user-centric websites, meticulously focusing on optimizing the user experience and driving increased user interaction. This resulted in elevated engagement metrics, higher traffic volumes, and enhanced website usability.

**TELINTEL • Bogotá, Colombia****Full Stack Developer • Sep 2019 – Nov 2020**

- Volunteered as a Java Back-End and Front-End Web Developer to seamlessly integrate an embeddable Drag and Drop editor for SaaS into the organization's flagship project, enhancing its functionality and user experience.
- Significantly improved system efficiency by reducing latency from two to one second within existing methods while working with REST APIs in Java and Spring frameworks. This optimization resulted in a more responsive application.
- Oversaw debugging efforts for the IVR Angular 8 project and successfully migrated a conventional web project to Angular 8. Implemented Filebeat, Logstash, Elasticsearch, and Kibana for comprehensive data analysis and took the lead in establishing continuous integration for Docker logs.
- Pioneered innovative approaches to enhance the value of microservices by developing a logging filter service within the Spring microservice architecture. Continuously monitored and analyzed microservices logs from Docker containers, optimizing system performance and troubleshooting processes.

**ADDITIONAL EXPERIENCE**

**Front-end Web Developer**, iDreamers Corp (U.S) | **Scrum Master**, Focus Group (AU) | **English Language Teacher**, CEMID (Bogotá, D.C, CO) | **Full Stack Developer/Intern**, Pink Taxi (EG) | **Web Developer Intern**, Rimo Tours (EG)

**TECHNICAL EXPERTISE**

ReactJS | VueJS | AngularJS | JavaScript - 5, ES6+Babel | jQuery | Ajax | Vuex | TypeScript | React Hooks | Material UI | HTML5 | CSS3 | Tailwind CSS | SASS | NodeJS | ExpressJS | JWT Authentication | REST APIs | API Design | SpringBoot | Java | MongoDB | MySQL | Elasticsearch | Apache Maven | Docker | Jenkins | GITLAB | Continuous Integration/Continuous Deployment (CI/CD) | Digital Ocean | Vercel | AWS | Microsoft Windows | Linux | MAC | GIT | SVN | Scrum | Jira | YouTrack | XML | JSON | Frontend Testing with Jest | JUnit | Eclipse | WordPress | Visual Studio Code | Microsoft Word | Object-Oriented Programming | Redux | Firebase | Cron | Figma

**EDUCATION & PROFESSIONAL DEVELOPMENT**

**Bachelor of Computer Science** - National University of Computer & Emerging Sciences (FAST), 2019

**Courses:** Object-Oriented Programming | Data Structures | Discrete Structures | Algorithms | Machine Learning | Artificial Intelligence | Calculus | Probability | Advanced Programming (Java) | Software Engineering

**Volunteer Work:** Vice President of Nutech'19 | President of Registrations | President of Project50Kids | President of Hope Society | Head Gaming Competition | Group Leader | Event Organizer
